RENALL WINDOWS AND DOORS

The unbeatable thermal rating of timber has paved the way for a revival in the use of timber for the exterior joinery markets of Europe where governments have mandated higher standards of insulation in all buildings. These same higher expectations for thermal standards are currently changing New Zealanders' perception of the importance insulated windows play in the target of achieving warmer and healthier housing.

With the commissioning of the WEINIG CONTUREX machine centre in March 2012, RENALL WINDOWS & DOORS can now offer the highest quality timber windows and doors available anywhere in the world.

Wood is the perfect material for window construction. It is versatile, flexible and combines two properties of immense importance these days, energy efficiency and sustainability.

Our European designed timber windows encompass all the benefits of decades of product development in an environment acknowledged to produce the most sophisticated and sought after windows in the world.

OUR WINDOWS ARE:

- SUSTAINABLE: of all the materials commonly offered for window construction, timber, aluminium or PVC, timber is clearly the most sustainable.
- ENVIRONMENTALLY FRIENDLY: there is no other more natural and environmentally friendly product than timber for window construction, it's that simple.
- DURABLE: all our windows are made from durable timber and completely factory sealed and finished ready for installation.
- FLEXIBLE: sill, facing boards and internal reveals may be configured to accommodate any proposed or existing opening detail or construction method.
- DOUBLE OR TRIPLE GLAZED: able to accept double or triple glazed units from 24mm to 36mm thick.
- HIGH QUALITY EUROPEAN
 MANUFACTURED HARDWARE highest
 quality multi-point locking systems on all
 windows and doors. Compliant with United
 Kingdom Secure by Design standards.
- DRAFT PROOF: the double factory seals provide the fullest possible protection against heat loss and drafts.
- NO CONDENSATION: the high insulation properties of natural timber, in conjunction with the sealed double glazing unit are sufficient to eliminate all condensation problems associated with windows and doors.
- HIGHEST THERMAL VALUE: timber is capable of naturally achieving the highest U value of all materials currently used for window construction.
- DISPOSABLE: completely and naturally disposable or recyclable.
- EUROPEAN DESIGN IN ALL WINDOW and DOOR OPTIONS INCLUDING:
- A. High performance casement windows
- B. Double hung windows
- C. Lift and slide door systems
- D. Folding doors and windows
- E. French/entrance doors, open in/open out.
